Celebrating the Vibrancy of Planet Earth

A curated catalog of beauty and wonder

From vast prairies to towering mountains and arid deserts to seemingly endless seas, the diversity of our planet is truly awe-inspiring. Our Project Earth catalog provides a comprehensive list of planet-themed works that highlight subject matter such as flora, natural elements, the seasons, and environmental action, among others. Complete with pieces for orchestra, band, choir, chamber ensemble, and solo instruments/voices, this is a valuable resource for music that celebrates the natural world.

Our approach to a more sustainable future

Over the past two decades, our company has embraced the use of electronic documents for business and production, reducing paper usage and shipping at every stage of the publishing and reprint process. We eliminated the replication of CDs and DVDs, switching to cloud storage and A/V content downloads. Our organization also transitioned from direct mail to digital marketing methods, reducing waste and improving targeting. Digital printing allowed us to use eco-friendly inks and eliminate oversized print runs. Finally, much of our catalog is now available digitally on reading platforms such as Newzik and forScore. Using all these strategies, we have been able to expand our catalog, providing more selection to our customers while reducing waste. We recognize that there are still improvements to be made, and remain committed to exploring alternative ways of operating.
